GAMIFIED FINANCIAL VISUALIZER

For
Demo 3

Presented by :

INTRODUCTION

Welcome to the Gamified Financial Visualizer – where managing your money feels less like a chore and more like an adventure.

Our system is designed to transform financial literacy into an interactive journey. Instead of being greeted by walls of numbers and graphs, you'll find yourself in a world of progress bars, achievements, challenges, and communities that make finance engaging, rewarding, and fun.

Whether you're here to track expenses, set ambitious goals, or compete with friends in challenges, the system turns everyday financial habits into opportunities for growth and recognition. Think of it as your personal finance coach meets gaming dashboard – keeping you motivated while giving you real control over your money.

Gamified – Finance Overview

The Gamified Financial Visualizer is designed to transform financial management into an engaging journey. Instead of presenting information in plain lists and charts, the system uses an interactive city-themed interface to represent different areas of your finances. Each page of the system provides a specific set of tools and experiences that work together to make managing money both practical and rewarding.

Home

The Home Page welcomes you with a 3D animated city. Each building in the city represents a different part of your financial life, such as the Bank, Residences, Food Market, Café, or Police Station. Hovering over a building reveals tooltips that guide you, while clicking takes you directly to the corresponding feature. This city is not just for show it evolves with your progress, reflecting your financial journey in a fun, interactive way. At the top of the page, the navigation bar provides quick access to all other sections, giving you the freedom to explore the city visually or through direct menus.

Accounts

The Accounts section is divided into four interconnected pages: Insights, Transactions, Budget, and Import. The Insights page converts raw data into patterns and summaries, helping you understand how your spending and saving habits are evolving. The Transactions page allows you to add, edit, or delete financial records while automatically sorting them into categories like income, expenses, or transfers. On the Budget page, you can create category-based or monthly budgets and monitor your progress against them. The Import page connects your real-world finances to the system, allowing you to upload your bank statements so that all your financial activity is synchronized in one place. Together, these pages ensure that your money is organized, traceable, and easier to manage.

Goals

The Goals page makes saving money more interactive and motivating. Instead of simply tracking amounts, you set clear financial targets that are displayed with progress bars, showing how much you have saved versus your goal. Each goal has a defined XP reward, meaning that as you save, you are also rewarded within the system. Completing goals unlocks achievements and reinforces consistent financial discipline, turning long-term habits into short-term wins.

Achievements

The Achievements page is your trophy collection, showcasing the badges and milestones you've unlocked throughout your journey. Whether it's completing a financial goal, finishing a learning quiz, or consistently logging transactions, each achievement is a marker of progress. The achievements are organized into categories, making it easy to see what you've earned and what's still waiting to be unlocked. This page provides both motivation and recognition, celebrating the effort you put into building stronger financial habits.

Community

The Community page introduces a social element to finance. Here, you can connect with friends, view your existing network, and send or accept friend requests. Communities also allow you to interact with others who share similar goals, creating a sense of collaboration and accountability. By blending social engagement with financial management, the Community page makes money feel less isolating and more collective.

Challenges

Challenges transform everyday financial habits into friendly competitions. On this page, you can browse, join, or create challenges, whether individually or with friends and communities. Each challenge has its own objectives, deadlines, and XP rewards. Progress is tracked in real time, and completing challenges not only strengthens your financial discipline but also gives you bragging rights and recognition within your community..

Learning Modules

The Learning page turns financial education into a structured, rewarding experience. It contains modules made up of short lessons, each focused on a key financial concept such as budgeting, saving, or investing. At the end of each lesson, you complete a quiz that tests your understanding. Correct answers reward you with XP, meaning that as you improve your knowledge, you also advance within the system. This ensures that learning about money is not only practical but also motivating.

Profile

The Profile page is your personal hub. At the top, it displays your avatar, name, and tier level, along with a performance panel summarizing your financial accuracy, leaderboard position, and overall activity. Below, you can view your current goals, complete with progress indicators, and see your most recent achievements. Subsections of the profile allow you to edit your personal details, update security settings such as your password, and manage your friends list or pending requests. The Profile also contains an activity snapshot, showing your most recent actions within the system. In essence, this page provides a complete view of your identity, progress, and preferences, all in one place.

Support

The Support page ensures that you are never left unsure about how the system works. It contains explanations of every feature and page, guiding you through any questions you might have. This page is designed to provide quick help and clarity, so that you can continue your journey without interruptions.

Create an Account

Step 1 : Navigate to register page

- From the login page, click the Sign Up link to open the registration page.

Step 2: Fill in your details

- Username : Must contain lowercase letters, numbers, dots or underscores, and be between 3-15 characters.
- Full Name : Enter your complete name.
- Email Address : Enter a valid email.
- Password : Must be more than 8 characters, include
 - at least:
 - One lowercase letter
 - One uppercase letter
 - One number
 - One special character
 - Confirm Password – Must match the password entered above.

Step 2 : Create your account

- Click the Register button.
- If all details are valid, you will be redirected back to the Login Page.

Logging In

Step 1 : Enter login details

- Enter your username in the first field
- Enter your password in the second field
- (Optional) Click the eye icon in the password box to view the password and check for typos.

Step 2 : Sign In

- Click the green Login button
- If your details are correct, you will be redirected to your Home page

Home Page

Purpose. The Home Page is your interactive 3D city and the visual map of the app. Each building represents a part of your finances. Hover to see a tooltip; click to open a focused card with details and a direct action.

When you click a building, a card opens with the building name, a preview image, a brief description, and live stats from your data. For spend areas like Food Market, you'll see Budget Left, Spend month-to-date, your Budget target, recent Visits, and any XP you can earn. The primary button (for example, Manage Groceries) takes you straight to the page where you review transactions or adjust budgets. Values update automatically as you add transactions or change budgets

A persistent nav bar lets you jump to Accounts (with Insights, Transactions, Budget, Import), Goals, Learn, Achievements, Community, and Support at any time. A Lighting & Theme control on the right adjusts the scene's look , and the help icon in the corner opens guidance without leaving the page.

Accounts – Transactions

Create an Account

Step 1: Open the Accounts Page

- From the home page navigate to the navigation Bar at the top of the page
- Hover over or click on Accounts on the menu . A dropdown will appear with four options :
 - Transactions
 - Budgets
 - Imports
 - Insights
- Click on Transactions

Step 2: Start Adding a New Account

- Once you click on Transactions, the page will display:
 - Account Cards (on the left) showing each linked account's name, type, and balance.
 - Recent Transactions Table (on the right) listing:
 - Transaction Name
 - Date
 - Category
 - Amount (income in green, expenses in red)
 - Actions (edit or delete)

Step 3: Start adding a new account

- Click the green “+ Add” button above the Accounts section.
- A modal will pop up
- Enter the following information:
 - Account Name (e.g., Savings, Business, Credit Card)
 - Account Type (e.g., Bank, Cash, Investment)
 - Currency
 - Initial Balance (optional)
- Click the save to create the account.
- The new account card will appear on the right side of the page

Viewing accounts transactions

Step 1: Select an Account

- On the right side, click on the Account Card you want to view

Step 2: Review the Transaction List

- The Transaction Table will update to show all transactions linked to that account

Step 3: Filter Transactions

- Use the filter options above the transaction list to refine results by:
 - Date range
 - Category
 - Income or Expense type

Adding a Transaction

Step 1: Select the Account

- On the right side, click the Account Card where you want to add the transaction.
- The transaction list for that account will appear

Step 2: Click add Transaction button

- Above the transaction table, click the + Add Transaction button.

Step 3: Fill in transaction details

- Enter the following information:
 - Transaction Name/Description
 - Date
 - Amount (income or expense)
 - Category (e.g., Groceries, Utilities, Salary)
 - Linked Account (auto-selected if already viewing an account)
 - Optional Links – Budget, Challenge, or Goal
- Click the save button
- The new transaction will appear in the list for that account

Editing a Transaction

Use Edit to fix typos, amounts, dates, or categories on an existing transaction without recreating it. Any changes you save instantly update your account totals, budgets, and insights.

- Click the pencil icon next to a transaction to update its details.

Deleting a Transaction

Use Delete to remove a transaction that was added by mistake or is a duplicate. Deletions are permanent and immediately update your balances, budgets, and insights

- Click the trash icon next to a transaction to delete its details.
- A pop up to confirm will show up
- Click yes to delete the transaction
- Transaction will be removed from the list

Accounts – Budget

Adding a Budget

Step 1: Accessing the budget subpage

- Navigate to the Navigation Bar at the top.
- Hover over or click Accounts in the menu.
- A dropdown will appear with four options:
 - Transactions
 - Budgets
 - Import
 - Insights
- Click on Budgets.

Step 2: Fill in Budget Details

- Click the “Create Budget” button.
- Fill in the form:
 - Category (e.g., Groceries, Transport, Entertainment)
 - Budget Limit (maximum amount you plan to spend)
- Click Save Budget.

Step 3: View Budget

- Your budget will appear in the Budgets list with a progress tracker.

Accounts – Insights Overview

To open Insights, use the top navigation, hover over Accounts, and choose Insights. This page turns your raw transactions into explanations, trends, and simple takeaways you can act on immediately.

AI Financial Advisor

At the top is a prompt bar where you can ask focused questions—anything from “How can I improve my savings rate?” to “Review my debt strategy.” Quick prompts help you start fast, and the Analyze button generates guidance in plain language. Think of this as a mini consult: you ask, it reads your data, then suggests what to change and why.

Your Financial Standing

Below the advisor you’ll see a status card summarizing where you stand right now. It highlights how many of your categories are spending less than average, your Financial Health Score, and your Savings Rate Percentile (for example, “Top 40%”). A short coach note underneath translates those numbers into encouragement or a gentle nudge, so you always know whether you’re on track.

AI-Generated Financial Summary

This narrative block explains your month in a few sentences—what improved, what slipped, and what’s likely next. It’s followed by compact stat tiles such as your updated Financial Health Score, estimated Savings Potential per month through optimizations, and a forward-looking goal projection. The goal is context: not just charts, but explanations.

Financial Sentiment

A gauge reads your recent behavior as Anxious, Unstable, Stable, or Confident and shows small supporting indicators such as impulse score and burn rate. A green status strip gives one clear action, and a short set of tips shows where to focus first. It's a quick gut-check of how your habits feel in practice.

Monthly Spending by Category

A stacked bar chart breaks down monthly spend by category, with controls along the top to switch the account view, change the scale between amount and percent, and choose which categories to include. A dashed reference line shows a global average so you can see when you're overshooting the norm. Use this when you want to spot the one or two categories doing the damage

Income vs Expenses

Here you'll see income and expense bars across months with average lines layered on top. A toggle lets you view Overall or By Account. This is the easiest place to confirm that income consistently clears expenses—or to notice months where it didn't and investigate why.

Account Distribution

A donut chart shows where your total balance sits across accounts. It's great for a quick diversification check—are you keeping too much idle in one place, or is your distribution balanced?

Accounts – Importing

Importing a bank Statement

Step 1: Accessing the import feature

- Navigate to the Navigation Bar at the top.
- Hover over or click Accounts in the menu.
- Click on Import.

Step 2: Specifying Import details

- Before uploading your file:
 - Destination Account – Select the account you want these transactions to be added to.
 - Bank Name – Choose your bank from the dropdown list.
 - Password (Optional) – If your document is password-protected, enter the password to allow processing.

Step 3: Uploading Your bank Statement

- You have two options:
 - Option 1: Click Upload
 - Click the Upload button and select your bank statement file from your device.
 - Option 2: Drag and Drop
 - Simply drag your bank statement file from your computer into the upload area.

Step 4: Processing the Statement

- Click Review Transaction.
- The system will process your file and use AI to extract all transactions.

Step 5: Reviewing the AI-Generated Transaction table

- A Transaction Table will be displayed showing:
 - Date
 - Category
 - Amount
- Carefully review each transaction.
- If you notice any errors:
 - Click the Edit button next to the transaction to correct it.

Step 6: Finalizing the Import

- Once you're happy with the imported data, click Confirm Import.
- The transactions will be saved and linked to your selected account.

View goals details

Step 1: Accessing the goals page

- Navigate to the Navigation Bar at the top.
- Hover over or click Goals in the menu.
- Click on “Your Goals”

Step 2: Select a Goal

- At the top you'll see a progress bar with the current amount vs target and a percentage.
- The page also shows the due date, the XP reward you'll earn on completion, and the goal type and category.
- These values update as you add contributions or adjust the goal.

Step 3: Review Goal details

- This will open the Goal Detail Page, showing:
 - Progress percentage
 - Target and current value
 - Due date
 - XP reward
 - Goal type and category
- From here, you can:
 - Delete the goal if it's no longer needed

Create a goal

Step 1: Accessing create Goal page

- On the Navigation Bar, hover over Goals.
- From the dropdown menu, select Create a Goal.

Step 2: Filling in Goal Details

- On the Create Goal page, enter the following:
 - Goal Name – e.g., Vacation Fund, Emergency Savings
 - Target Amount (R) – The amount you aim to save
 - Timeframe – Start Date and End Date
 - Goal Type – e.g., Savings, Debt Repayment, Investment
 - Category – Choose a category such as Accommodation, Transport, Education
 - Visual Representation – Select an image to represent your goal
 - XP Reward – Automatically displayed based on goal type and value

Step 3: Saving Your Goal

- After filling out all fields, click Create Goal.
- The new goal will be added to your Goals Overview Page and progress will be tracked automatically.

Learn Page

The Learning Page allows users to boost their financial knowledge through interactive modules, lessons, and quizzes. It provides a simple, gamified way to learn more about budgeting, saving, investing, and other financial concepts. Completing lessons and quizzes will reward you with XP points, helping you track your growth and progress in financial literacy.

To access the learning page:

- On the Navigation Bar, hover over Learn.
- From the dropdown menu, select Modules
- This will take you to a page with all modules

When you open the Learning page, you will see:

- Score and Level – At the top, you can view your learning score, XP progress bar, and your current level.
- Performance Stats – Displays the number of courses available, percentage completed, points earned, lessons viewed, quizzes left, and quiz attempts. (Screenshot here – the last picture you provided)
- All Courses – A searchable list of all available courses/modules.
- Course Cards – Each card displays the module name, difficulty level (Beginner, Intermediate, Advanced), number of lessons, and a "View More" button.

- Selecting View More opens the Module Overview.
- The header confirms the module title and estimated time. A Your Progress bar tracks completion within this module.
- The Lessons list shows each lesson with a minute estimate.
- You can open lessons in any order, but working top-to-bottom makes it easier to pass the quiz on the first try.
- Use Back to Courses to return to Learn Home at any time—your progress is saved automatically.

Completing lessons

- Open a lesson to expand it. Read the content;
 - when the lesson requirements are met it shows a Completed badge and your progress bar moves forward.
 - Collapse the lesson to return to the list and open the next one.
- If you stop partway, the page remembers where you were when you come back.

Taking the quiz

- At the end of the module you'll find Module Quiz (sometimes labeled Knowledge Check). The panel tells you how many questions there are and the pass score (e.g., 3/5).
- Select the best answer for each question and submit. Your score appears instantly with a short message plus two actions:
 - Retake Quiz to improve your score
 - Continue Learning (move back to lessons or another module).
- Passing updates the stats on Learn Home and contributes to your overall level.

Tracking progress & XP

Learn Score & Level increase as you finish lessons and pass quizzes. Points show the total learning points you've earned; they roll up into your score/level. % Completed, Lessons Viewed, Quizzes Left, and Quiz Attempts help you plan what to do next.

These values update in real time across Learn Home and the Module Overview.

Achievements

The Achievements page lets you track your progress, rewards, and milestones. You can filter, sort, and view details of each achievement to stay motivated on your journey.

Step 1: Accessing the Achievements Section

To view and track your achievements:

1. Go to the top navigation bar.
2. Hover over Achievements.
3. A dropdown will appear → select one of the following:
 - All Achievements – full overview of your progress.
 - Complete – only your completed achievements.
 - Incomplete – achievements you are still working on.

Step 2: Viewing All Achievements

- On the All Achievements page, check your performance summary at the top (points, badges, quizzes, rank).
- Scroll down to see the achievement grid, which displays both completed and incomplete achievements.
- Click any achievement card to open its details and subtasks.

Step 3: Sort and Filter Achievements

- Use the filters to narrow achievements by category:
 - Financial
 - Learning
 - Community
- Use the sort menu to arrange by:
 - Alphabetical (A-Z)
 - XP (High → Low)
 - Progress (High → Low)

Viewing Completed Achievements

Step 1: Open the Completed Achievements Page

- From the top navigation bar, hover over Achievements.
- Click on Complete to open the page.
- The page will display all achievements you have successfully finished.

Step 2: Review Completed Achievements

- Each card shows:
- A full progress bar
- XP earned
- Completion badge or icon
- Use this page to celebrate your progress and track your rewards.

Step 3: Sort & Filter Completed Achievements

- At the top of the page, use filters to narrow down by category:
 - ● Financial
 - ● Learning
 - ● Community
- Use the sort menu to arrange your achievements by:
 - Alphabetical (A-Z)
 - XP (high → low)
 - Date completed (newest → oldest)

Viewing Incomplete Achievements

Step 1: Open the Incomplete Achievements Page

- From the top navigation bar, hover over Achievements.
- Click on Incomplete to open the page.
- The page will display all achievements you have started but not yet finished.

Step 2: Track Incomplete Progress

- Each card shows:
 - Current progress bar
 - XP earned so far
 - Tasks completed out of the total (e.g., 2/5)
- Use this page to focus on tasks you still need to complete.
- Once all tasks are finished, the card will automatically move to the Complete page.

Step 3: Sort & Filter Incomplete Achievements

- At the top of the page, use filters to focus on specific categories:
 - ● Financial
 - ● Learning
 - ● Community
- Use the sort menu to arrange incomplete achievements by:
 - Alphabetical (A-Z)
 - XP (high → low)
 - Progress (highest % → lowest %)

Community– Social page

The Social Page is your community feed, where you can see posts, updates, and the leaderboard.

Step 1: Access the Social Page

- From the top navigation bar, go to Community
- then click Social.

Step 2: Engage with the Feed

- Scroll through posts from friends and community members.
- Interact by liking or commenting on updates

Step 3: Create & Track Progress

- Click Create Post to share an update with a caption, banner, and tags.
- Check the Leaderboard on the left panel to view top-ranked members by XP.

Community – Friends

The Friends Page helps you build and manage your connections. Here you can view your current friends, send new friend requests, search for specific users, and explore their profiles with details like stats, achievements, and communities.

Step 1: Access the Friends Page

- From the top navigation bar, go to Community.
- From there click Friends.

Step 2: Manage and Add Friends

- View your current list of friends.
- Options include View Profile or Remove Friend.
- Scroll to Someone New and click Request to send a friend request.
- Use the search bar to quickly find someone.

Steps 3: View Friend Profiles

- Click View to open a friend's profile.
- See their stats, achievements, and communities.
- If not already connected, click Request Friend.

Community – Communities

The Communities Page is where you connect with groups of like-minded people. Here, you can create your own community, join others, participate in challenges, and track progress together.

Access the Communities Page

- From the top navigation bar, go to Community
- then from there click Communities.

Create or Discover Communities

- Click Create Community to set up a group with a name, description, and banner.
- Or scroll to Discover Communities to browse available groups.
- Use View to learn more about a group and click Join if interested.

View and Manage a Community

- Inside a community, check members, challenges, and XP progress.
- Track completed challenges and see top contributors.
- Use options like Edit, Leave, or Create Challenge to stay engaged.

Community – Challenges

The Challenges Page is where you take part in community challenges, monitor progress, and earn XP rewards. You can view active, upcoming, completed, or expired challenges and even create your own for your community.

Step 1: Access the Challenges Page

- From the top navigation bar, go to Community
- then from there click Communities.

Step 2: Browse and View Challenges

- Use filters (Active, Upcoming, Completed, Expired) to organize challenges.
- Click View on a challenge card to see its details, including the goal, participants, and XP reward.

Step 3: Track or Create Challenges

- In Completed, review your finished challenges and XP earned.
- In Expired, check goals you missed.
- Click Create Challenge to start a new one for your community.

Profile

The Profile Page allows you to manage your personal details, monitor performance stats, and track your goals, achievements, and community activity. From here, you can also access the Settings Page to update preferences like dark mode, password, or notifications.

Accessing profile page

- Click your user icon on the top-right corner of the screen.
- Select Profile from the dropdown menu.

Profile Page Overview

When you open the Profile Page, you will see:

- Performance Overview Bar – Tracks your overall XP and progress.
- Quick Stats – Displays counts for goals, achievements, accounts, transactions, and lessons.
- Profile Details – Shows your username, avatar, and join date.
- Performance Stats Section – Accuracy, leaderboard position, challenges, and goals progress.
- Recent Achievements – A summary of your latest earned rewards.
- Active Communities & Posts – Shows your participation in communities and shared posts.

Accessing the Settings Page

- Click your user icon on the top-right corner again.
- Select Settings from the dropdown menu.

Settings Page Overview

On the Settings Page, you can:

- Change Username – Update your display name.
- Preferences – Toggle Dark Mode, enable notifications, and set two-factor verification.
- Change Password – Update your password securely.
- Change Avatar – Choose a new avatar image.
- Danger Zone – Permanently delete your account if needed

Activating Dark Mode

- Go to the Preferences section on the Settings Page.
- Toggle the Dark Mode switch.
- The entire system will instantly switch to Dark Mode for easier viewing

Logging Out

- Click on your user icon at the top-right corner of the page.
- In the dropdown menu, select Logout.
- You will be redirected to the Login Page.

Support – Overview

The Support Page is the main help center of the system. It gives you direct access to guides, explanations, tutorials, and frequently asked questions so that you can navigate and understand all features with ease. The Support section is always available in the top navigation bar under the Support tab.

Step 1: Open the Help Menu

- From the top navigation bar, click on Support.
- A dropdown menu will appear with multiple options.

Step 2: Navigate to the Overview Page

- In the dropdown, select Overview.
- This will open the Overview Page, which displays different cards for various features (e.g., Home Dashboard, Accounts, Goals, etc.).

Step 3: Select the Accounts Card

- On the Overview page, click the Accounts card.
- This will take you to the Accounts Help Page, where you'll see a structured explanation of all sections of the Accounts feature (Account Overview, Transaction Manager, Budget Insights, etc.).
- Completing this exploration will also reward you with +5 XP

Support –Tutorials

The Tutorials section provides step-by-step guidance and walkthrough videos to help you learn how to use different features in the app. Completing tutorials also rewards you with XP, making your learning experience fun and rewarding.

Step 1: Open the Tutorials Section

- From the top navigation bar, click on Support.
- In the dropdown menu, select Tutorials.
- This will take you to the Quest Academy page, where tutorials are available for different features.

Step 2: Select a Tutorial

- On the Quest Academy page, you will see cards for various tutorials (e.g., “How to Set a Goal,” “Dashboard Overview,” “Master Transactions”).
- Each card shows the number of steps, XP rewards, and whether a video guide is available.
- To start a tutorial, click Start Quest on the desired card.

Step 3: Complete the Tutorial

- After clicking Start Quest, you will enter the tutorial page.
- Here, you can choose between:
- Step-by-Step Guide → A detailed walkthrough with screenshots for each step.
- Video Guide → A video tutorial explaining the same process.
- Follow the instructions until completion to earn the XP reward.

Support – FAQ

The FAQ page is your quick help center, where you can click to expand answers to common questions. It's organized by categories and adds a fun gamified twist with XP and streaks.

Step 1: Accessing the FAQ Section

- Go to the top navigation bar.
- Hover over Support.
- A dropdown will appear with options: Help Center, Overview, Tutorials, FAQs.
- Click on FAQs.
- The Knowledge Vault page will open, showing common questions and categories.

Step 2: Exploring FAQ Categories

On the Knowledge Vault page, you will find different categories such as:

- Goal Quests – Create goals, set deadlines, track progress.
- Community Adventures – Join or leave communities.
- Other Categories – Depending on your unlocked progress.

Step 3: Unlocking FAQ Answers

- Each FAQ has a + (plus icon).
- Click + to expand the answer.
- The answer provides step-by-step instructions.

Thank You
